NATIONAL

Gharials in the Chambal River

Release of Gharials:

- The Chief Minister of Madhya Pradesh recently released 10 gharials into the Chambal River. This initiative aims to bolster the population of this critically endangered species.

Conservation Efforts:

- This action underscores Madhya Pradesh's leading role in gharial conservation. The state is home to a significant portion of India's gharial population, particularly within the National Chambal Sanctuary.

Importance of the Chambal River:

- The Chambal River is a crucial habitat for gharials.
- The National Chambal Sanctuary plays a vital role in protecting these animals and their ecosystem. Threats to the Gharial population include, Habitat destruction, and pollution. So these efforts are key to the species survival.
- ❖ World Crocodile Day was celebrated at Nandankanan Zoological Park, Bhubaneswar on 17th June 2023.

SCIENCE

Oarfish

"Doomsday Fish" has been spotted near the shores of Baja California Sur, Mexico. The "Doomsday Fish" refers to the oarfish, a deep-sea creature that has become associated with folklore predicting impending natural disasters.

Oarfish Characteristics:

- Oarfish are large, elongated fish with a ribbon-like body and can grow to significant lengths.
- They are deep-sea dwellers, which is why sightings are relatively rare. Their unusual appearance and deep-sea habitat contribute to the mystique and folklore surrounding them.

Folklore and Superstition:

- In Japanese folklore, the oarfish is known as "Ryugu no tsukai," or "Messenger from the Sea God's Palace."
- Its appearance near the surface is traditionally believed to be a harbinger of earthquakes and tsunamis. This association has led to it being called the "Doomsday Fish."

REPORT

World Busiest Airport 2025 - OAG report

Shifting Rankings:

- There are shifts in the top positions, demonstrating the dynamic nature of global air travel.
- For example, Dubai International Airport (DXB) has taken the top position, and Hartsfield-Jackson Atlanta International Airport (ATL) is in second place.
- This highlights the growing importance of hubs like Dubai in international air travel.

Growth in Asia:

- Airports in Asia, such as Tokyo Haneda (HND), Shanghai Pudong (PVG), and Delhi (DEL), are prominent in the rankings. This indicates the strong growth of the aviation sector in the Asian region. Also increased capacity at Hong Kong international airport.

Indian Airport Presence:

- Indira Gandhi International Airport (IGI) in Delhi has secured a place in the top 10. This signifies India's increasing role in global air traffic and the expansion of its aviation infrastructure.
